

HEINE BETA X VET Otoscope

The right diagnosis, fur real.

The new HEINE X CHANGE System

Expand the functionality of your otoscope with easily interchangeable X CHANGE modules:

► HEINE X CHANGE System SL-Magnifier

- 1.6x magnification
- multi-coated, swiveling precision optics for pin-sharp images
- Comfortable instrumentation — perfect for precise procedures in the ear canal, nose, oral cavity, and throat

► HEINE X CHANGE System Smartphone Adapter

- Easy capture of digital images with any smartphone

Metal specula made of surgical stainless steel in Ø 4 and 6 mm

- High-quality and easy to clean
- Secure fit on the headpiece
- Controlled quality. No sharp edges
- Rounded speculum tip for gentle insertion into the ear canal

Tongue Depressor

- For simplified inspection of the oral cavity
- Various sizes

Intuitive illumination control

- Easy switching between otoscope illumination and the exclusive HEINE inSPECT illumination
- Two brightness levels selectable for each illumination option
- Practical one-finger operation

Smart power supply

- Charge status indicator
- Automatic switch-off function
- Rechargeable via USB-C or charging station

HEINE BETA X VET Otoscope

HEINE LED^{HQ} and fiber optic technology for optimal illumination

- Uniform and very bright illumination with true-to-life color rendering for high contrast and highly detailed visualization
- Fiber optics provide an unobstructed view of the ear canal and tympanum
- Extended battery life and virtually unlimited LED^{HQ} service life

Funnel inner diameter: 6 mm

- Easy instrumentation

smooth SURFACE

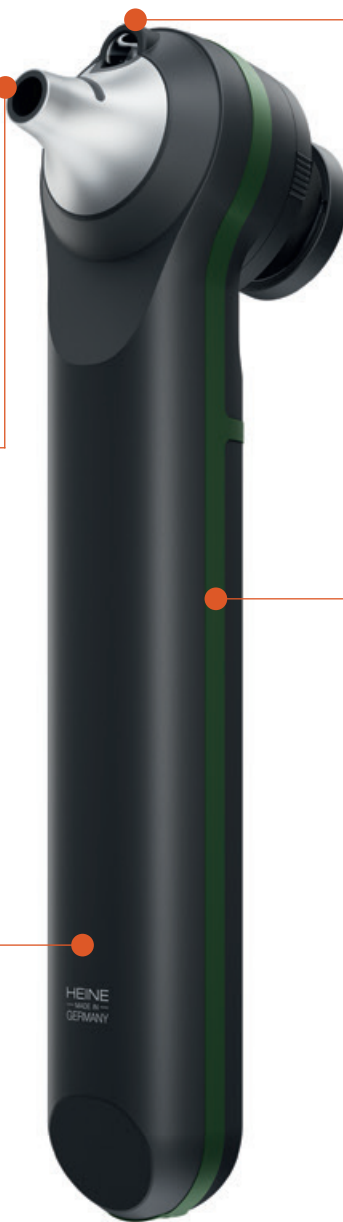

Safe, hygienic reprocessing thanks to the smoothSURFACE and recessed connectors.

The new additional HEINE inSPECT examination light for eyes, throat, and more

- Unique worldwide and patent pending: medically tested and safe for examining the anterior ocular media and the pupillary reflex
- Ideal for illuminating deep anatomical structures in the mouth and throat

Durable, lightweight, and ergonomic

- Solid integrated aluminum frame
- Housing made from a special, highly impact-resistant material mix, thermoformed and optimized for hygienic reprocessing
- Precisely balanced for excellent ergonomics and safe handling
